The Egyptian Phoenix

A mythical bird with a colorful plumage and a tail of purple, blue, and green according to some legends. It has a 500 to 1,000 year life-cycle, near the end of which it builds itself a nest of twigs that then ignites; both nest and bird burn fiercely and are reduced to ashes, from which a new, young Phoenix or Phoenix egg arises, reborn anew to live again. The new Phoenix is destined to live as long as it's old self.

SUGGESTED NAME
Over the next 3 years, the 3 MS HBCUs will lose ~$33M in state funding, thus the need to re-think the current educational delivery and organizational model.

A unification of the 3 schools (Consolidated Entity University or CEU) could be done in three phases: 1) "slam" the 3 entities together; 2) push for investment; potentially result in $23-31M in recurring savings – after a $10M one time investment.

A unification would continue the operations of each campus, allow each campus to offer its best to students while eliminating organizational duplicity; and create a higher level of process efficiency.

Unification of the 3 schools (Consolidated Entity University or CEU) could potentially result in $23-31M in recurring savings – after a $10M one time investment.
